SWAT MOLLE

[to colleague](#)

[PDF version](#)

GH Armor's SWAT comes with the MOLLE pocket attachment system and provides full front and back panel protection in addition to shoulder protection with the attached ballistic yoke. Additional features such as the optional collar, groin and arm protectors make this vest our most integrated body armor system. Front over back side closure uses a cummerbund for quick and accurate donning.

A suede lined low profile back ballistic collar is comfortable against the neck and prevents a helmet from being dislodged when prone. The vest has rubberized shooting pads on both shoulders and attachment points for slings.

Standard Features

Benefits

Cordura® Fabric

- Durable water repellant outer finish and Polyurethane inner coating is strong, lightweight and resists fluids
- The tough, abrasion resistant carrier fabric resists dirt, is easy to clean and dries quickly

MOLLE pocket system

- Pockets attach using the MOLLE system for placing equipment where needed
- MOLLE is extremely durable with no parts that can become projectiles

Heavy-Duty Woven Elastic

- Excellent memory to help maintain the form and life of the armor

Hook and Loop Fasteners

- Provides the optimal combination of strong grip and long life

Hard Armor Pockets

- 10"x12" plate pocket on front and rear for hard armor plates

Suede Lined Collar

- Low profile collar reduces irritation against neck

4-Point Adjustable Carrier

- Adjustable straps allow the wearer a customized comfortable fit without compromising protection

Ballistic Panel Suspension System

- Supports the panel from the shoulder
- Prevents curling or buckling of the ballistic panel at the bottom of the vest
- Holds panels securely to prevent shifting within the carrier

Removable Panels

- Openings for panel removal are located on the inside of the carrier and are held secure with hook and loop closures for easy removal of panels for washing of carrier
